BRAND

Demko[®]
KNIVES

Discover Demko Knives, designed by Andrew Demko, creator of some of the toughest knife locks. These knives feature the Shark-Lock: strong, safe, and easy to use. A favourite of pros and collectors.

Andrew Demko is one of the absolute best in the knife world. He designed several ultra-strong locks for the American brand Cold Steel, which became very famous in the knife world. He is now continuing that technical passion at Demko Knives.

There's the AD20.5 from Taiwan with its clever Shark-Lock locking mechanism, or the larger, US-made AD20 for really heavy-duty work. Prefer a fixed blade? The robust FreeReign and compact Armiger models are ready and waiting. Even the small Shark-Cub embodies the Demko spirit: compact, well-designed and ready for everyday use.

VICTORINOX ALOX LIMITED EDITION 2026

GLACIAL BLUE

The annual Alox Limited Edition knives by Victorinox are something many collectors look forward to every year. For 2026, the Swiss brand has chosen Glacial Blue. A bright, cool shade of blue that brings to mind Alpine ice and glaciers. Calm and elegant, yet powerful and energetic. A colour that appeals to anyone who enjoys being outdoors.

As in previous years, Victorinox has once again chosen the same three iconic models for 2026. Two handy Swiss Army knives for everyday use: the compact Classic SD and the practical Pioneer X. And one pocket knife for those looking for something robust: the Evoke.

FISKARS KINDLING SPLITTER

X-SERIE

COLLECTION

With the Fiskars X-series kindling splitters, you can quickly and safely split wood into small pieces of kindling. You don't need a chopping block, your axe remains undamaged and the risk of accidents is much smaller. Place the wood in the splitter, hit it with a hammer, and you're done. It couldn't be safer!

Partners, friends or family, everyone can now safely chop wood without worrying about blunt axes or accidents. The splitters are available in

two sizes: small and large. In no time, you'll have a whole stack of kindling ready to go. Ready for a cosy crackling fire

COLLECTION

LIONSTEEL M4

The LionSteel M4 is an all-round fixed knife, designed for bushcrafters and outdoor enthusiasts. This knife is large enough to be versatile in nature, yet compact and light enough to take with you on hikes. The mix of modern lines and classic details creates a timeless look.

Discover the Knivesandtools Exclusive variants too! Created in collaboration with LionSteel, these exclusive models are available only here. The blade is made of CPM MagnaCut instead of M390, for even better corrosion resistance, greater wear resistance and higher hardness. Ideal for intensive use, in all weather conditions.

HULTAFORS

PREMIUM KVILLINGE SPLITTING AXE

The Hultafors Kvillinge is no ordinary splitting axe. It is a well-designed tool with character. Tradition and craftsmanship are felt in every swing. The heavy, wedge-shaped head splits wood with conviction, as if every log already knows what's coming.

Hultafors

Sleek design, premium materials and meticulous attention to detail: WE Knife takes modern knives to the next level. Fresh, distinctive and built to perform.

WE Knife manufactures knives with an eye for detail and excellent finish. From amazing milled details to a sublimely sharp edge. The designs are fresh and quirky, combining creativity and premium materials in models that not only look good, but also work extremely well.

In addition, WE Knife collaborates with well-known names in the knife world. We're talking about Raven the Pirate's Ryson, DBK's Nightblade, and Ben Petersen's Banter. Not standard tools, but knives with character and their own story.

HEDGEHOG

COLLECTION

If you are looking for a sturdy and reliable slipjoint pocket knife, look no further. These stylish pocket knives feel solid and are neatly finished, with attention to detail. The Hedgehog is available with or without bolsters, with a cleaver or spearpoint blade and with different handle materials. There is bound to be a Hedgehog that suits you.

The knife is equipped with a slipjoint mechanism, meaning that the blade is not fully locked. You open it with two hands via the nail nick. This makes the Hedgehog particularly suitable

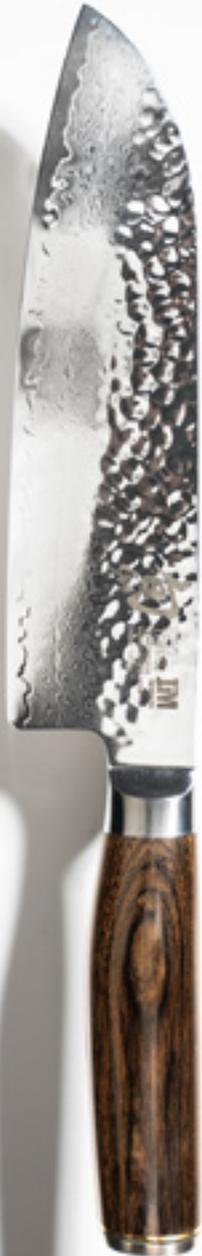

for countries where legislation requires a non-locking blade. Ready for a new Hedgehog? For a bargain, it's yours.

KAI SHUN PREMIER

TIM MÄLZER

COLLECTION

The Kai Shun Premier Tim Mälzer series, designed by German chef Tim Mälzer, is anything but standard. The blade itself has three finishes. From the back to halfway down, you can see the manual hammering, known as Tsuchime to insiders. Cool to look at and practical. Ingredients are less likely to stick. Beneath this, the matte Damascus layers that Shun is famous for emerge, culminating in a razor-sharp, high-gloss polished edge.

The walnut Pakka wood handle is elegant and fits comfortably and securely in the hand. From compact turning knives to generous santoku knives and chef's knives: this series is sure to delight any cooking enthusiast.

HOW DO YOU SHARPEN A CHEF'S KNIFE?

PRO TIP

Sharpening your chef's knife? It's easier than you think. Is the knife crushing rather than slicing a tomato? Then it's time to sharpen the knife. But how, and by what means? We explain the best sharpening methods in simple terms!

Read here how to sharpen your chef's knife the right way.

LEATHERMAN
WAVE
ALPHA

The Leatherman Wave Alpha takes the popular Wave series to an even higher level. With a MagnaCut blade, sturdy G10 handle scales, and extra-large, spring-loaded scissors, it's ready for any job. Compact, powerful, and surprisingly complete.

Discover all tools and make it your new everyday favourite.
