BUCK

NEXT / LEVEL / GEAR

110 SLIM HERITAGE ELITE

The Buck 110 has been around since 1963 and is widely regarded as the iconic pocket knife. The Slim Heritage Elite is a modern version for a new generation of users: slimmer, with a practical pocket clip and a blade made from Premium MagnaCut steel.

STEEL TYPE:	MAGNACUT
HANDLE MATERIAL	BRASS/NICKEL SILVER WITH EBONY WOOD
STATUS	ICONIC

VICTORINOX HUNTSMAN / SPARTAN

STROOP- WAFEL EDITION

Two Swiss icons with a touch of Dutch culture. Where the signature red Victorinox scales usually steal the show, these editions feature scales inspired by the Netherlands' most iconic cookie: the stroopwafel!

DEMKO

AD20

The Demko Knives AD20 is a robust pocket knife for serious use. The AD20 series is made entirely in the United States and, thanks to its larger size, is ideal for users looking for a heavy-duty pocket knife.

The knives are available in various premium steel types and handle materials, and are equipped with the innovative Shark-Lock, designed by Andrew Demko. This lock owes its name to the fin-shaped protrusion on the spine of the knife.

Pull it back with your finger and you'll unlock the blade quickly and easily. This makes the AD20 both safe and pleasant to use.

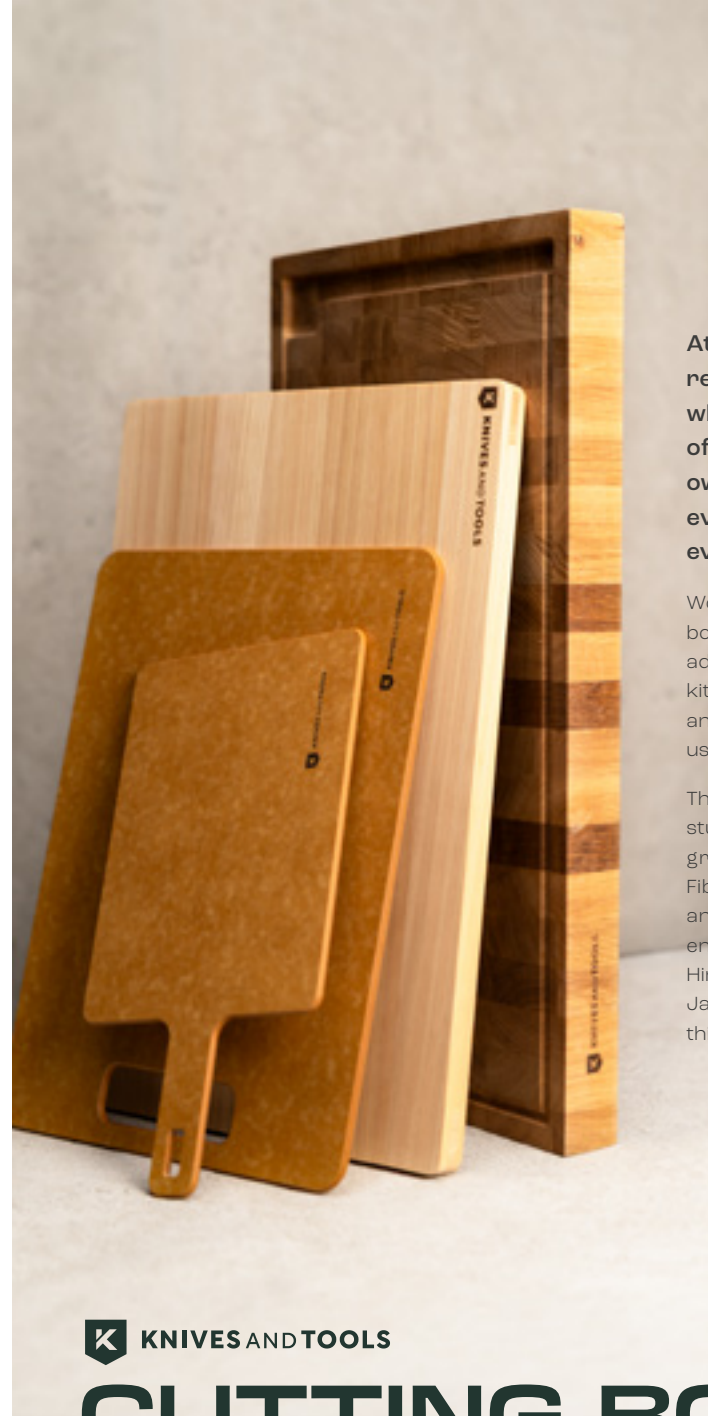

SERIES

SERIES

KAI SHUN KAGEROU

The Japanese Kai Shun Kagerou series is made for those who love knives with character. Kagerou means 'heat haze', and you can see this in the damascus pattern, which resembles shimmering heat waves along the cutting edge. The blade consists of 71 layers of stainless damascus steel, with polished stainless steel on top. Between them, a copper line gleams: the result of the complex cu mai forging technique.

The grey handle of stabilised pakkawood is symmetrically shaped and feels comfortable and familiar in the hand. The end cap with Shun logo adds a stylish detail. Together with the seamless finish, this ensures a luxurious appearance and a beautifully balanced feel.

At Knivesandtools, everything revolves around cutting. That is why you will now find a selection of cutting boards under our own Knivesandtools brand, for every kitchen, every knife and every cooking need.

Wood is a great material for cutting boards: it's gentle on your knives and adds a natural, warm touch to the kitchen. Discover our 3 wooden Knivesandtools cutting boards. Practical to use and stylish on your worktop.

The End Grain Cutting Board is elegant, sturdy and durable thanks to the end-grain wood. The practical Wood Fiber cutting boards are thin, strong and dishwasher safe. For the true enthusiast, there are the traditional Hinoki cutting boards. Made from soft Japanese wood that is ideal for very thin Japanese kitchen knives.

CUTTING BOARDS

KNAFS®

HELLE

POLARIS

The Polaris is the newest addition to the Nord series. Its compact blade does not stand out because of what extra it can do, but precisely because of what it leaves out. No unnecessary weight or length: a smaller knife has to be spot on. And the Helle Polaris is exactly that.

A SIMEN STRYCKERS DESIGN

SERIES

The Grailer 2Ti is a slim and stylish pocket knife, designed by Simen Stryckers and produced in collaboration with Grailer and WE Knife. The Grailer 2Ti is an all-rounder. Whether you're enjoying a juicy steak at a nice restaurant or doing some work in and around the house. The Grailer 2Ti feels at home anywhere!

The Grailer 2Ti is the 2nd generation of the original Grailer 2, which was equipped with a carbon-fibre handle. Since the introduction of that model, Simen has not been idle. As a knifemaker, he has continued to create, refine processes and push his boundaries with innovative locking mechanisms and unique finishes. The Grailer 2Ti reflects his development and growth as a knifemaker.

LIONSTEEL

SKINNY

The LionSteel Skinny owes its name to the slim frame, which is an integral part of the knife. The frame is milled from a single piece of titanium or aluminium. And the technical details do not stop there.

The Skinny is also fitted with LionSteel's famous REF system: a removable flipper. This turns a knife that can be opened with one hand into a knife that is opened with two hands. Useful with local knife laws in mind, or simply because you prefer it that way. An impressive detail and a feature that is technically difficult to produce.

GERBER

CENTER-DRIVE

The Gerber Center-Drive is a pocket-sized toolbox! The extra-long screwdriver, aligned with the centre axis of the tool, is revolutionary. This provides the full torque and rotational force of a real screwdriver.

OUTDOOR KITCHEN KNIVES

Outdoor kitchen knives are versatile knives for outdoor cooking. Great for barbecues, handy for camping and ideal for the outdoor kitchen. They stand out from standard kitchen knives because they are robust and made to take with you.

CIVIVI

ELEMENTUM

The Civivi Elementum series is a real favourite for anyone looking for a knife that comes in handy every day. From small jobs at home to use on the go: think of opening parcels, cutting rope or preparing food during a walk.

Within this series, there is a suitable version for almost everyone. Are you looking for a pocket knife that can be opened with one hand, a fixed-blade model or perhaps a UK-legal version? Would you prefer a chic carbon-fibre handle or grippy micarta?

The Elementum series offers plenty of choice! It is precisely that combination of versatility that makes this series so popular within the Civivi range.

LEDLENSER LIGHTS

Whether you're looking for a head torch, a compact keyring torch or a powerful spotlight: Ledlenser lights are packed with great features. Think of high-quality LEDs, practical focusing rings and intuitive rotary switches. Add exceptionally robust build quality and you have lights that won't leave you in the dark.
